COMMONS BACKS LLOYD GEORGE IN LABOR DEBATE

Quotes Trotzky to Defeat Nationalization.

LONDON, Feb. 11.-William Brace. president of the South Wales Miners' federation, speaking today in the house of commons in behalf of labor, moved an amendment to the reply to the speech from the throne delivered yesterday by King George, expressing regret for "the absence of any proposal to nationalize the coal mines of the country along lines recommended by the majority of the members of the royal commission on the coal industry, which was appointed to advise the government as to the best methods of reorganizing the industry.'

Mr. Brace contended that the miners had been led to suppose that the gov-ernment would accept the recommendations of the majority of the coal com-

Nationalization "Inevitable."

He declared that nationalization ould not mean bureaucratic control. The government might delay nationalization, but, he predicted, it could not revent nationalization from coming. Mr. Brace said there would be a committee to manage each pit, and a committee for each of the fourteen districts into which Great Britain would be divided.

Finally, there would be a body, with a president of mines as chairman, to supervise all coal fields. The miners, the officials, and the general public would be represented, and each would be in the minority.

Premier Lloyd George replied that it would be impossible to have nationali zation without bureaucracy. He de clared there was no guarantee that the plan proposed would increase the pres ent output, and ridiculed Mr. Brace's idea that the miners would work harder for the state than for private inter

Organized labors on the railroads said it would

Such provisions were stricken from the bill now Now organized labor proposes to strike anyway,

The issue is clear. It is not a private controversy. The public, the whole nation, is vitally interested in its decision; not only railroad labor but office, all will be taxed directly or indirectly if the wage demand is granted. Whether the roads are ideals, in the beauty of American nationalism and in government or private hands, rates must go up in the importance of American destiny. to meet it, and with this presumably the cost of For Americans nothing continues unless the

LINCOLN'S AMERICANISM.

In 1862 Lincoln wrote his well known letter to INTERED AS SECUND CLASS MATTER, JUNE 3, 1908, AT Horace Greeley: "If there be those who would not save the Union unless they could at the same time save slavery, I do not agree with them. If there be those who would not save the Union unless they could at the same time destroy slavery, I do not agree with them. My paramount object in this struggle is to save the Union, and is not either to save or destroy slavery. If I could save the Union without freeing any slave, I would do it; and if I could save it by freeing all the slaves, I would do it; and if I could save it by freeing some and leaving others alone. I would also do that."

In 1864 he wrote to A. G. Hodges of Frankfort Ky.: "I could not feel that, to the best of my ability. I had even tried to preserve the constitution, if, to save slavery or any minor matter, I should permit the wreck of government, country, and constitution all together."

The moral question of slavery which was para mount to abolitionists was a minor matter to Lincoln. He was "naturally anti-slavery." He was transcendently more than that. He was the chief American magistrate and his whole obligation, moral, spiritual and legal, was to the United States whether the United States were under the oblique of permitting slavery or not.

The old American idea was that this nation had special destiny in the affairs of the world and had a special significance to men. Even if it were for the time corrupted by slavery and even if its strike if anti-strike provisions were included in the ideals were shamed by that, it was nevertheless the most important thing to preserve the nation for its destiny

If it were to serve its purpose it had to retain its unity. There could be no other disaster so bad as the weakening of the nation. No benefits which the world or people of any kind could receive would compensate for the impairment of American sovereignty. Even so profound an injustice and so terrible a disgrace as the continuance of slavery was a minor matter.

Americanism was a belief in the validity of Amer ican purpose, in the magnificence of America

United States continues and everything is impaired if the United States is impaired. It cannot be subordinated any more than it could be divided. Our "paramount object in this struggle is to thing else.

The bacillus of anthrax is peculiar in

The public health service, investigating the subject of anthrax in the hair to be made into shaving brushes, came to the conclusion that there were several sources of almost uncontrollable infection and recommended the following nethod for sterilizing shaving brushes: " Soak the brush for four hours in a 10 per cent solution of formalin. This solution should be kept at a temperature of 110 degrees Fahrenheit and the brush should be agitated occasionally that the solution may reach all parts of the bristles."

A man purchasing a new brush is advised to sterilize it before using it. The anthrax spores are very hard to kill. A single boiling with plain water will not kill them.

In an infection through the skin the local lesion resembles a carbuncie. It develops one, to two days after scratch. The center of the carbuncle generally is dark in color, dead in pearance and sunken. The pain is less than in ordinary carbuncle, but the swelling is greater and the constitutional reaction is greater. The anthrax patient is much sicker than the carbuncle patient. In fact, it is probable that many of the fatal cases of carbuncle so-called developing in nondiabetics really are cases of anthrax infection. This is the usual form of anthrax as it is known in this country.

The bacilli may be swallowed, producing anthrax of the intestines. Such cases are rare and seldom recognized They may be inhaled, producing anthrax of the lungs. A form of lung anthrax common in Europe is known as wool sorters' disease. The symptoms much the same as pneumonia. If the patient dies in a few days the ble diagnosis would be pneumonia. BLUE MILK.

Chicago, Feb. 6.—[Editor of The Tribune.]—The heating of milk to a temperature of 145 degrees and the h of it at that temperature for thirty misutes before cooling it is accepted as proper pasteurization. To ask for a temperature of 155, as a health measure, is to cast a suspicion on the whole pro ess as ordinarily employed and to me urrect the exploded theories of ten years ago, when the holding process of pasteurization had not been adopted. If a tem-perature of 145 is too low now, it is always too low, but very few would require a higher temperature.

Not only that; a temperature of 15 degrees F. requires more steam, mor refrigeration, more work, to clean 0 equipment, and reduces the capacity When milk was heated to high to

" DOWN TO CASES." Chicago, Feb. 8 .- [Editor of The une.]-As the gambler would say, "Ist get down to cases" on this universal military training question and find out "where we are at." The little affair that we engaged in in Europe two years ago cost us between \$20,000,000,000 and \$30,000,000,000 (not counting 200,000 lives). Now, it is generally con that Germany never would have for us into the war had we been even pe tially prepared-in other words, preparedness cost us the above sum. Congressman Kahn estimates \$130,000,000 a year will be sufficient carry out our program of universal train knowing by actual experience what preparedness costs, we find that in two years we spent enough money to he given us protection for over 150 years. Can there be any sane argument as to which is the wiser policy?

Why Risk Ruining 1000 Worth of Clothes To Save a Few Cents on Soap

Washable clothes now cost over 100% more on the average than they did a year or so ago. So, of course it's more important to save them.

But saving a few cents, by using cheap, adulterated soaps, won't save the expensive clothes. That is false economy. It is risking fifty to one hundred dollars or more to save a couple of cents.

That extra cent or two you invest in a cake of pure, neutral soap is the cheapest and best clothes insurance you can buy.

KIRK'S AMERICAN FAMILY SOAP

is absolutely neutral, and the purest soap you can buy. For over three generations, by daily use, housewives have proved it to be the laundry soap containing the greatest soap value. American Family is made of nothing but the purest animal fats and vegetable oils. It lasts longer and washes quicker and more thoroughly in warm or cold water and never injures, spots or discolors the daintiest fabrics, always leaving the clothes lily white, sweet smelling and clean. Its purity is a by-word and cannot be imitated any more than its name. Insist on Kirk's American Family Soap. It saves your clothes.

Cheaper To Buy Good Soap Than New Clothes

Oakland High Power and Economy On a Longer Wheelbase

For peace years of bigger transportation demand, Oakland has built Model 34-C, carrying forward Oakland's proved engineering principles in a car still scientifically light in total weight but endowed with huge strength-an automobile measured and balanced for the fiercest daily service grind.

Oakland's traditional high power plus complete economy now rides on a longer wheelbase, a deeper frame and heavier cross members; longer, heavier front springs; a heavier front axle, and some 30 additional advancements that maintain the Sensible Six's position of performance-equality with very highpriced automobiles.

Concentrated in this latest model are all the results of Oakland's engineering development occurring during the three war years when this work could not be devoted unrestrictedly to citizen supply.

The Oakland Sensible Six 34-C is designed to deliver the highest grade of, transportation at the lowest cost of ownership, operation and maintenance; it runs 18 to 25 miles on a gallon of gasoline and 8,000 to 12,000 miles on tires; it maintains the same ratio of horsepower to car weight which has placed it, with a certain \$5,000 car, ahead of the other high-powered automobiles of

The Larger Oakland Closed Cars

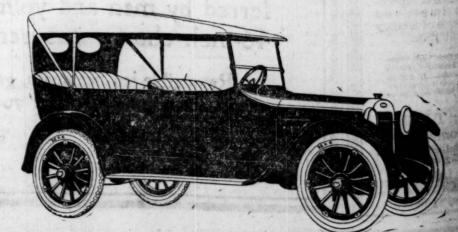

The Oakland Sensible Six four door Sedan and the Coupe, on the longer wheelbase and with the model 34-C chassis advancements, present in increased measure those features of comfort, convenience and reliability which for years past have commended these cars to a rapidly increasing ownership.

roduct. In life he was its champion, death a saint whose tomb is now its hrine. More than a half century has one since, with reverent hands, his countrymen bore him to his last rest-ing place, and yet his pitless logic, his serene faith in God and man, are the surest defenses of the country for which he lived and died."

In those words Gov. Frank O. Low before delegates of the Lincoln League of America, a Negro organization now in convention at the South Park Methodist Episcopal church. He ended his speech by expressing the hope that "the great Negro race shall see to it that Lincoln shall not have ived and died in vain."

Columbus, O., Feb. 11 .- [Special. -Ohio State lost an excellent opportunity to defeat the onrushing Chicago basketball team at the Collseum to-night through inability to make good on many chances to score, and the Maroons won a big ten game, 19 to 13. The victory keeps Chicago in a tie with Illinois for first place in the conference

leading by 9 to 3, with Francis producing all the locals' points at the free throw line. A switch in the Buckeye lineup in the second half inspired the team with fighting spirit, and the Scar-let and Gray set about coppering the Chicago lead with a great display of speed. Wirthwein started a repid fire attack, which put the visitors on the run, Ohio being within two points of the Maroons most of the time, but never quite able to catch up.

Birkhoff dribbled with fine dash and his floor work, which made him star

We can tell you a lot of interesting facts about the LORD SALISBURY Turkish cigarette. We can tell you the tobacco is the tenderest and finest type of Turkish; that the paper around it is of purest French quality; that the cigarette is made in the cleanest factory in the world.

But what of that? You can't know the cigarette until you try it. All this information is useless unless you test LORD SALISBURY for yourself.

Your taste is the infallible guide—the only one. It telegraphs your brain either approval or disapproval. But you've got to give it a chance to operate. There's only one way. Try LORD SALISBURY.

SPRING CALVES

BY FRANK RIDGWAY. Spring calves are arriving now, and during the next two months dairymen will be kept busy caring for them. Unfortunately spring calves come at the busy time of the year, when farmers are rushed with building fences and crops, and there is little time to spend with dairy cows. They are often slighted at a time when they need the

With the coming of the spring calves and the disagreeableness and inconvenience of caring for them, farmers are again reminded of the disadvantage of the year.
Fall calves get two summers on pas-

ture before they come into production spring calves only one summer. The first summer for spring calves is not counted because they are not old enough to graze to any extent. Pastures have always played an import ant role on the dairy farm, especially in feeding growing stock, and grass is still the cheapest feed for all classes of fairy animals. Recent study at the University of Illinois confirms pinion of dairymen of the great importance of pasture in milk production. Flies are hard on spring calves during the summer, and when fall comes and the calf is weaned the change of diet plus the cold weather proves a double hardship. When the fall calf s weaned the weaning is offset by the advantages connected with spring weather and green grass.

The fall calving system more even ly balances farm labor throughout the year and enables the farmer to hire his help by the year. Of course the cost of producing milk varies with the sea son of the year, being higher in the winter. In calculating the seasonal costs of milk production the dairyman often overlooks the feeding cost of the cow when she is not giving milk, usu ally six to eight weeks.

A Special Selling of Boys' Suits: Mackinaws

Turns Today's Holiday to Profitable Account

And it is perhaps the most noteworthy feature of this selling that these special pricings apply to boys' suits and mackinaws from our own regular assortments, rearranged because size ranges in former groupings became broken. Indeed, even if there is not urgent need of new clothing for immediate wear, purchases from these assortments will prove profitable investments with future needs in mind,

Boys' Suits Grouped at \$19.75 Each Suit with Two Pairs of Knickerbockers

The excellent quality of materials and workmanship of these splendid suits is immediately apparent—so that it need only be added that the most approved styles and patterns are included. All sizes from 6 to 18 years may be found in the assortment as a whole. \$19.75.

210 Boys' Suits Now Priced \$15 Some with Two Pairs of Knickerbockers

At this pricing are suits for immediate wear, regrouped and reduced in price for quick clearance. The styles are those most approved, with workmanship and fabric-quality to insure satisfactory service. The limited choice in any one size suggests early selection. Sizes 7 to 17 years.

Boys' Mackinaws Reduced to \$12.75

And these are the sorts of warm mackinaws all boys prefer-tailored of bright plaid mackinaw cloth in likable patterns. Collars are in the comfortable convertible style; all-around belts and roomy patch pockets. Sizes 7 to 18 years, now \$12.75.

CARSON PIRIE SCOTT & CO

An Unusual Selling of 2,000 Knitted Silk Cravats, \$2.95

Because of an unusual purchase, these cravats are featured at this special pricing, itself worthy of particular emphasis, for cravats of such fine qualities are seldom to be had so priced. This large quantity of men's fine knitted silk cravats contains

Crocheted effects, grenadine stitches and accordion weaves - in the new medium-narrow shapes desired for spring.

There are cravats in navy blue, royal purple, green, brown and black, as well as in attractive two-color effects.

Men discriminating in their choice of neckwear will find it of advantage to select several cravats at this pricing, \$2.95 each.

CITY NEWS BRIEFS LITTLE MARY, 7, **CLEARS FATHER** OF WIFE SLAYING

Then Frees "Daddy."

Former Policeman Richard Flaherty probably owes his life to the unshaken testimony given in his behalf by his 7 year old daughter, Mary Catherine. That was the general opinion expressed vesterday when a jury in Judge Sabath's court after three hours' deliberation found Flaherty not guilty of having killed his wife, Anna, on Aug. 5, 1918. The verdict ended a trial of

principal witness on Tuesday. She was asked whether she had not told the police after her mother's death that her father had kicked and beaten her mother. The most adroit cross ex-amination failed to shake her denial.

WORLD'S GRAIN MARKET NEWS PRICE OF HOGS

The upward reaction in grains has been sharper than expected without there being any change in the general situation from a bearish standpoint, so far as the financial situation is considered. Foreign exchange has advanced and there has been a little export, has advanced and there has been a little export business done on the decline.

The main factors that have counted most in the advance of 10% on February and 7c in the advance of 10% on February and 7c in the advance of 10% on February and 7c in the advance of 10% on February and 7c in the advance of 10% on February and 7c in the jow point Monday, are the overgold condition of the market, a belief on the part of shippers that there had been break owned by exporters would not affect the

beliveries were 6.000 bu after the close. At Kansas City 80,000 bu cash corn law been delivered on February contracts so far this months, against 22,000 bu at Chicago.

With grain prices higher there was a more confident feeling among holders, and less so on the part of the bears. At the close the latter argued that as offers had been operative for two days the short interest had been reduced, so that the market needs.

There is north as southern Oklahoma.

Minneapolls flour output last week argregated 253,000 bris, against 240,000 bris has year, as shown by the Northwestern Miller's report to Ware & Leland. Flour sales were disappointingly light the last week. Millers looked for good buying at a decline of \$4.00@1.25 for good buying at a decline of \$4.00@1.25 for price, which failed to materialize.

The Chicago Flour club, meeting the latter argued that as offers had been operative for two days the short interest had been reduced, so that the market needs bill.

When Buying Real Estate

First, see that the surroundings of the property and transportation to it are satisfactory.

Second, insist that the seller furnish you an Abstract of Title or Title Guarantee Policy made by the Chicago Title and Trust Company.

If the seller cannot furnish an Abstract of Title or Guarantee Policy, do not buy. The large investors require this and you should insist upon receiving the

Third, have the property conveyed to yourself and wife by joint tenancy deed, then if either of you die the survivor will own the property without the trouble and expense of going through the Probate Court.

Go to any good lawyer and he will see to it that you receive the above.

Hear these famous Victor artists!

Extraordinary interest attaches to the recitals of these great artists because of the double opportunity they afford the musicloving public.

It is a privilege in itself to hear these famous artists, and added importance is given to the events in that they enable you to compare their exquisite interpretations with their Victor

Attend the concerts of these artists and note the individual qualities that distinguish their renditions. Then go to any Victor dealer's and hear the Victor Records by the same artists. Note how faithfully their interpretations are portrayed on the Victrola.

It is because of this absolute fidelity that these three artists make Victor Records; that the greatest artists of all the world are Victor artists.

Victrolas in great variety of styles from \$25 to \$1500. New Victor Records demonstrated at all dealers on the 1st of each month.

What is the Money Value of Good Sound Sleep

THE average man is critical about his food, his clothes and the house he lives in. These things cost him money, and he insists on getting money's worth.

But sleep is free. He is apt to be casual about his sleeping hours -and in selecting a bed, he thinks more about style and price than he does about sleep.

Think about beds in relation to sleep-and you will go straight to the Simmons Metal Bed, built for sleep.

> Thousands of people will tell you that they never realized how deep and sound sleep can be, until they discarded wooden beds and ordinary metal beds for a Simmons Bed -noiseless, rectful, sleep-inviting.

> Simmons Company are pioneer makers of Metal Beds for sleep.

Makers of those wonderful Simmons Springs, that really do invite the body to lie out flat, every muscle relaxed.

Specialists, too, in Twin Beds —that fine principle of a separate bed for every one, so that one sleeper does not disturb the other, or communicate a cold or other ailment.

Ask the leading dealer in your section about Simmons Steel Beds. Brass Beds, Springs, Day Beds and Children's Cribs-the most popular sleeping equipment in his store.

They cost little if any more than ordinary beds and springs.

And when you are selecting your Simmons Beds with an eye to their appearance in the room, you will see that Simmons has for the first time established beautiful and authoritative design in Metal Beds.

Sleep is a big subject! Write us for the brochure, "What Leading Medical Journals and Health Magazines Say about Separate Beds and Sound Sleep:" Free of charge.
